PROFILE

Software Engineer with 5+ years of experience building SaaS web products across edtech, fintech, crypto and the public sector, including LLM-powered applications. Owns features from discovery and data modeling through deployment and production support. Interested in system design and the cutting-edge engineering practices behind reliable, scalable and resilient software.

SKILLS

Languages	JavaScript, TypeScript, Ruby, Java, Python, SQL
Frontend	React, Next.js, Redux Toolkit, Angular
Backend	Node.js, NestJS, Ruby on Rails, Spring Boot, REST APIs, OpenAPI
Data	PostgreSQL, MongoDB, Redis, migrations
Delivery	AWS ECS/RDS, Docker, Kubernetes, Terraform, GitHub Actions
Quality	Observability (OpenTelemetry, Grafana), unit, integration, and E2E testing
Systems	Distributed systems, event-driven architecture, Kafka

EXPERIENCE

ISG Group

Mid-Level Full-Stack/Backend Software Engineer @ Estudologia Aug 2024 – Jan 2026

- Contributed to AVA Canal Educação, an LLM-powered learning platform serving over 150,000 users across 600 schools.
 - Owned a competitive multiplayer quiz game feature with AI-generated questions.
 - Provided production support for critical user-facing tickets.
- Built a comprehensive Student Information System from requirements to production.
 - Owned REST APIs across multiple modules, as well as full-stack features.
- Collaborated with product and design teams to translate user needs into intuitive features.

Mid-Level Full-Stack/Backend Software Engineer @ Inkluziva Feb 2024 – Aug 2024

- Served as the sole developer of an automated USDT trading system managing millions of dollars in capital.
 - Collaborated with the company owner (the system's user) to define requirements and tailor the system to his needs.
 - Mentored a new developer through pair programming, code reviews, and codebase guidance.
- Enhanced and maintained a multi-asset crypto wallet.
 - Built a feature to mint customizable NFTs in seconds without prior blockchain knowledge.

Incript *Mid-Level Frontend Software Engineer* Apr 2023 – Jan 2024

- Designed and built the UI for a webcomic platform aimed at students preparing for college entrance exams.
 - Built an admin backoffice to manage content, authors, users, moderation, roles and metrics.

OpahIT *Mid-Level Frontend Software Engineer* Feb 2021 – May 2021

Basis S.A. *Intern/Junior Full-Stack/Frontend Software Engineer* Dec 2018 – Sep 2020

PROJECTS

Arena Beach Tennis. Built a mobile-first web application to give casual beach tennis players a competitive, pro-level feel through Elo-based rankings, statistics, achievements, milestones and featured players. arenabeachtennis.com
